

NEW! Transmission Oil in MPM Bag-in Box Packaging

MPM Oil already offers Bag-in-Box packaging for engine oils and has now expanded this range to include transmission oils as well. This 20L packaging solution is designed to provide workshops with a more sustainable alternative to traditional plastic cans. The outer box is made of durable cardboard and produced without the use of additional colourants or bleaching agents. After use, the cardboard box can be disposed of with paper waste, while the plastic inner bag can be disposed of with residual waste. Empty Bag-in-Box packages can be easily compressed, reducing their volume by up to 90%. This further lowers the environmental impact of the MPM Bag-in-Box solution.

Key benefits of the MPM Bag-in-Box solution include:

- Leak-free tap
- Fits perfectly in existing MPM racks:
E3012L / E4020L / E4040L / E4060L
- Exceptionally robust packaging
- Recyclable packaging

References

MPM Oil now offers a Bag-in-Box solution for the following transmission oils:

- 16B20LV ATF LV Multi Vehicle
- 16B20ZF6S ATF ZF6S
- 18B20MTF Gear Oil 75W-80 GL-5 Premium Synthetic MTF
